WHAT WILL I SEE?

Mole, vole, gopher & armadillo activity may increase briefly as these pests leave the treated area. Then, you'll see no new ridges or mounds as SURE STOP MOLE & GOPHER REPELLENT repels these invaders for up to 2 months.

STORAGE AND DISPOSAL

Store only in original container in a dry place inaccessible to children and pets. Do not reuse empty container. Rinse thoroughly before discarding. Securely wrap in newspaper and discard in trash.

CAUTION

Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. If in eyes: Flush eyes with plenty of water. Call a physician if irritation persists. If on skin: Wash with plenty of soap and water. Get medical attention if irritation persists.

Do not apply this product undiluted. Do not apply to water.

WHAT IS THIS PRODUCT? AND WHAT DOES IT DO?

SURE STOP® MOLE & GOPHER REPELLENT protects lawns from damage caused by burrowing moles, voles, gophers & armadillos. It contains castor oil extracted from castor beans, which penetrates into the soil where these pests live and feed. It works by coating their favorite foods – worms, grubs, roots, and seeds – with castor oil, causing indigestion when moles, voles, gophers & armadillos feed. These pests quickly leave treated areas and won't return for up to 2 months.

SURE STOP MOLE & GOPHER REPELLENT is specially formulated for fast and easy application. It comes in a sprayer that attaches right to your garden hose. There's no mixing. Use only what you need, then put it away for next time.

HOW DO I USE THIS PRODUCT?

When to use: Spray lawns, gardens, and planting beds anytime moles, voles, gophers & armadillos are active, usually in the spring, summer, and fall. These pests are rarely seen above ground. Instead, their presence is indicated by ridges and volcano-like mounds of dirt created by their underground burrowing.

What to do:

1. If area to be treated is dry, water thoroughly before spraying SURE STOP MOLE & GOPHER REPELLENT.

2. Spray product uniformly over the entire area to be treated. One quart covers 6,200 sq. ft. of lawns, gardens, or planting beds. This container takes approximately 30 minutes to fully dispense.
3. After spraying, soak SURE STOP MOLE & GOPHER REPELLENT into the soil by watering for about 25 minutes. To avoid runoff, don't over-water.
4. If heavy rains (approximately 2 inches or more in 24 hours) occur right after spraying, re-treatment may be necessary.

HOSE END SPRAYER

Easy to Use.

1. Make sure knob Control lever is in the **OFF** position. Shake well and attach to hose.
2. Turn water on at faucet, aim nozzle toward lawn and turn knob Control lever to **ON** to begin spraying.
3. When finished turn Control lever to **OFF** position. Turn faucet to **OFF** position. Discharge residual water pressure by turning **ON** and **OFF** again.
